DiamondGlow® Facials in Redmond, WA

How DiamondGlow® facials work

DiamondGlow® Facials at MD MedSpa are a non-invasive skin resurfacing treatment that cleanses, exfoliates, and deeply hydrates — all in a single session, with no downtime.

About the treatment

Using a diamond-tipped wand, DiamondGlow® gently removes dead skin cells while simultaneously infusing professional-grade, personalised serums suited to your specific skin type. The result is skin that feels smoother, looks fuller, and glows — immediately after your session.

This treatment is particularly effective for:

- Fine lines and surface wrinkles
- Dry or dull-looking skin
- Enlarged pores
- Uneven skin tone and texture

Many clients notice visible improvements right after their session, with skin texture, tone, and hydration continuing to improve over the following days.
